

# ZBOONI SALES ONBOARDING DECK

## What Zbooni is

A Chat revenue & operations layer for high-ticket businesses — **not a payment link tool.**

## What we lead with (in order)

1. Speed & certainty (instant confirmation, retries, support)
2. Ability to handle high-value, complex payments
3. Operational control (tracking, reconciliation, CRM)
4. Human support when timing matters

✗ We do not lead with price   ✗ We do not compete feature-by-feature with Stripe

## Zbooni Qualification Checklist

### Sales Motion Fit

- ☐ Deals are closed via **WhatsApp or chat**, not purely on website
- ☐ Payments are **conversation-led** (quotes, approvals, follow-ups)
- ☐ More than one person is involved in closing or managing payments

**If 2+ boxes checked → good fit**

### Payment Complexity

- ☐ Average ticket above **AED 3,000**
- ☐ Deposits, milestones, or split payments are required
- ☐ One-off or irregular payment amounts (not fixed SKUs)
- ☐ International customers paying remotely

**If 2+ boxes checked → strong fit**

### Risk & Urgency Signals

- ☐ A failed payment can delay or kill a deal
- ☐ Timing matters (events, bookings, project start dates)
- ☐ Current provider offers **limited human support**
- ☐ They've experienced card declines, blocks, or friction

**If 1+ box checked → Zbooni advantage**

### Operational Pain

- ☐ Reconciliation is manual or spreadsheet-based
- ☐ Hard to track what was paid, by whom, and for what
- ☐ Hard to link payments to WhatsApp conversations
- ☐ Refunds or adjustments are painful

**If 2+ boxes checked → high value case**

### Switching Willingness

- ☐ They're open to using Zbooni **alongside** current provider
- ☐ They see value in having a **backup / insurance layer**
- ☐ They care more about reliability than lowest fees

**If 2+ boxes checked → move forward**

**If 0–1 box → de-prioritize**

#### **Decision Guide:**

- **Proceed:** Sales + Payment Complexity + 1 other section qualified
- **Selective:** 2 sections qualified → run a narrow demo
- **Disqualify:** Price-led, website-only, no urgency, no ops pain

### **Disqualification Signals (Avoid These)**

#### Always walk away if:

- They only want lowest fees
- Payments are fully and only automated on web
- They don't value support and engaging with their customers
- Low-ticket ecommerce or SKU-based selling
- Needs subscriptions or recurring billing
- Monthly volume < AED 300K with no growth plan
- "Just need a payment link" mentality

Internal rule: If Zbooni is not mission-critical, it will be price-compared and lost.

### **ICP Snapshot**

#### **Business Profile & Operating Model**

- Premium, service-led businesses
- Founder-led or privately held
- Client experience and brand image are strategic priorities
- Revenue driven by human interaction, not pure ecommerce
- Selling primarily via WhatsApp (primary), Instagram DMs, email, phone, and proposals
- Payments initiated after conversation, not via heavy web checkout

#### **Size, Scale & Geography**

- Monthly payment volume: AED 300K – AED 30M+
- Consistent or scalable payment activity (not one-off transactions)
- Conversation-led payment flows where speed and clarity impact conversion and cash flow
- Core markets: UAE, KSA, Egypt, Jordan
- International (excluding USA & Canada)

## **Decision Makers**

- Founder / Managing Director
- COO / Head of Operations
- CFO / Finance Director / Controller
- CMO / Head of Sales (industry dependent)

## **Customer Psychology**

### **Core Goals**

- Close deals inside chat, not chase payments
- Accept local and international payments instantly
- Reduce friction from proposal → payment → confirmation
- Scale volume without adding admin overhead
- Maintain a premium, trustworthy customer experience

### **High-Intent Pain Signals**

- Bank payment links with low approval rates and poor UX
- Reliance on bank transfers
- Single-MID dependency causing failed transactions
- WhatsApp screenshots used as payment proof
- Manual reconciliation and poor visibility per agent, project, or branch
- Delayed settlements impacting cash flow
- Slow PSP onboarding killing momentum
- Difficulty collecting deposits or partial payments

## **Why They Choose Zbooni**

### **Value Delivered**

- Chat-based payments with no integrations or development
- Multiple payment methods and smart routing
- Branded links with instant confirmation
- Faster cash collection and higher approval rates
- Clear reconciliation and auditable reporting
- Hands-on human support aligned with their workflow

### **Operational & Brand Value**

- Agent-, project-, and branch-level reporting
- Real-time finance dashboards
- Central control with decentralized collection
- Multi-currency and multi-entity support
- Premium, modern, conversation-first experience

## **Buying Triggers**

- Growth in WhatsApp or Instagram inquiries
- Seasonal volume spikes
- Complaints about failed payments, blocked funds, or delayed settlements

- Expansion into international markets
- Launch of a new service or geography
- Finance pushback on reconciliation complexity

### Disqualification Signals

- Low-ticket ecommerce or SKU-based selling
- Subscription or recurring billing needs
- Web-checkout dependency
- Monthly volume below AED 300K with no growth plan
- Price-led mindset or “just need a payment link” mentality

### One-Line ICP Summary

Premium, WhatsApp-led service businesses doing or capable of AED 300K+ monthly, selling high-ticket services where speed, experience, and payment certainty outweigh integrations and price.

### ICP Scoring

| ICP                                                    | Avg Ticket  | Volume Potential   | Sales Cycle  | Ops Complexity    | Revenue Potential | Priority |
|--------------------------------------------------------|-------------|--------------------|--------------|-------------------|-------------------|----------|
| <b>Luxury &amp; High-Ticket Services</b>               | Very High   | Medium             | Short        | Medium            | Very High         | P1       |
| <b>Gifting, Corporate &amp; Bespoke Experiences</b>    | Medium–High | High (seasonal)    | Short–Medium | Medium            | High              | P1       |
| <b>Events, Weddings &amp; Experiential Operators</b>   | High        | High (event-based) | Medium       | High              | Very High         | P1       |
| <b>Home, Design &amp; High-Value Contracting</b>       | High        | Medium             | Medium–Long  | Medium            | High              | P1       |
| <b>Boutique Hospitality &amp; Short-Stay Operators</b> | Medium–High | High               | Short        | Medium            | High              | P1       |
| <b>Premium Wellness &amp; Longevity Clinics</b>        | High        | Medium             | Medium       | High (compliance) | Medium–High       | P2       |
| <b>High-Ticket Coaching &amp; Advisory</b>             | Medium–High | Medium             | Short        | Low               | Medium            | P2       |
| <b>Education &amp; Training Providers</b>              | Medium      | High (cohorts)     | Medium       | Medium            | Medium            | P2       |

- P1 ICPs = fastest path to revenue + strongest Zbooni differentiation
- P2 ICPs = good expansion once core engine is running

## Industry Segment

### A. Luxury & High-Ticket Services

- Yacht & superyacht charter companies
- Exotic & luxury car rental fleets
- Private aviation brokers & charter services
- Luxury travel designers & concierge firms
- Personal shoppers / stylists serving HNWI (*High-Net-Worth Individual*)

#### Why they fit

- Average ticket: AED 5,000 - 100,000
- Bookings done via WhatsApp proposals & deposits
- Require instant payment confirmation
- High international client mix

#### Features to pitch

- Support for large one-off payments on a single link (up to AED 1M per link)
- Multiple payment methods (Amex, Apple Pay, Google Pay, PayPal, etc.)
- Multi-MID support for failed transactions, enabling retries via alternate MIDs (20+ MIDs)
- Immediate live support via call or WhatsApp for urgent or failed transactions
- Catalog (CShop) to pre-list services and share them directly via chat
- CRM to track customer order history and add internal notes

#### Hook

Most of our customers use WhatsApp to close high-value deals but struggle when payments fail or clients are international.

#### Angle

- One payment link up to AED 1M
- Multi-MID retries if a transaction fails
- Live support when timing matters

### B. Gifting, Corporate & Bespoke Experiences

- Premium corporate gifting houses (B2B contracts)
- Curated gift box brands (seasonal & bulk)

- High-end florists (events, weddings, corporate)
- Experience gifting platforms (vouchers, packages, activations)

#### **Why they fit**

- Strong seasonality = volume spikes
- Quoting + revisions handled in WhatsApp
- Deposits and balance payments required
- Multiple agents handling sales

#### **Features to pitch**

- Catalog (CShop) to pre-list services and share them directly via chat
- Multiple payment methods (Amex, Apple Pay, Google Pay, PayPal, etc.)
- Live payment link editing without creating new links; updates are reflected instantly for the customer
- In-app discount creation
- Promo code creation and management
- WhatsApp marketing campaigns for new customer acquisition through Zbooni verified number (campaign setup, message drafting, and end-to-end execution support)
- WhatsApp marketing campaigns sent via the merchant's verified WhatsApp number, including number verification, campaign setup, message drafting, and end-to-end execution support

#### **Hook**

We work with brands handling seasonal spikes, bulk orders, and multiple agents selling at once.

#### **Angle**

- Catalog + payment links inside WhatsApp
- Promo codes & campaigns for peak periods
- Centralized tracking across agents

### **C. Events, Weddings & Experiential Operators**

- Wedding planners & destination wedding agencies
- Event production & creative agencies
- Exhibition & expo organizers
- Pop-up markets & seasonal event operators
- Festival & experiential brand activations

### **Why they fit**

- Large upfront deposits (30–70%)
- Multiple stakeholders paying from different locations
- Revenue attribution by event, agent, or project
- Time sensitive payments (zero tolerance for delays)

### **Features to pitch**

- End-to-end event marketing management via WhatsApp using Zbooni data or the merchant's database
- Ticketing solution to issue, manage, and track event entry tickets
- Catalog (CShop) to pre-list products or services and share them directly via chat or QR code
- QR-based food ordering and payment solution to reduce queues, route orders directly to vendors, and notify customers when orders are ready for pickup
- POS machine for in-person card acceptance
- Customer database to track purchasers' names, phone numbers, and emails for re-engagement in future editions
- Master organizer dashboard to track sales and performance across all vendors
- Promo code creation and management

### **Hook**

Events fail when payments are delayed or fragmented — especially with multiple vendors and stakeholders.

### **Angle**

- Ticketing, QR payments, food ordering
- Master dashboard for organizers
- WhatsApp marketing + re-engagement

## **D. Home, Design & High-Value Contracting**

- Interior design studios
- Renovation & fit-out firms
- Architecture & landscape design companies
- Premium maintenance & contracting groups

### **Why they fit**

- Proposal-based selling

- Milestone & staged payments
- Heavy WhatsApp coordination
- Poor reconciliation with bank transfers

#### **Features to pitch**

- Support for large one-off payments on a single link (up to AED 1M per link)
- Customizable payment links allowing partial payments based on project stages with the ability to add images and descriptions
- Easy reconciliation to track payments, customers, and VAT
- Customizable instant customer receipt generation
- Catalog (CShop) to pre-list services and share them directly via chat
- CRM to track customer order history and add internal notes
- In-app discount creation

#### **Hook**

We help firms replace bank transfers with clean, staged card payments.

#### **Angle**

- Milestone-based payment links
- Easy reconciliation & VAT tracking
- Partial payments + receipts

### **E. Boutique Hospitality & Short-Stay Operators**

#### **Who**

- Boutique hospitality groups
- Holiday home operators & serviced residences
- Property management firms offering add-on services (cleaning, concierge, experiences)

#### **Why they fit**

- High-value bookings with deposits and balance payments
- International guests paying remotely
- Heavy WhatsApp communication pre-arrival
- Add-on services sold before and during the stay

### **Features to pitch**

- Support for large one-off payments on a single link (up to AED 1M per link)
- Customizable payment links allowing partial payments (deposit / balance / add-ons)
- International card acceptance
- Multiple payment methods (Amex, Apple Pay, Google Pay, PayPal, etc.)
- Instant customer receipt generation
- Easy reconciliation to track payments, customers, and VAT
- Catalog (CShop) to pre-list services and upsells and share them via chat or QR code
- CRM to track guest history, preferences, and add internal notes

### **Hook**

Guests want to pay instantly, remotely, and securely before arrival.

### **Angle**

- Deposits, balances, and upsells via WhatsApp
- Multi-currency + international cards
- Guest CRM & reconciliation

## **F. Premium Wellness, Aesthetics & Longevity Clinics**

### **Who**

- Premium wellness clinics
- Aesthetic & cosmetic treatment centres
- Longevity, IV therapy, and advanced diagnostics clinics

### **Why they fit**

- High-ticket treatment packages
- Deposits required to secure appointments
- International and medical-tourism clients
- Need for trust, confirmation, and smooth payment experience

### **Features to pitch**

- Customizable payment links allowing staged or package-based payments
- Multiple payment methods (Amex, Apple Pay, Google Pay, PayPal, Tabby, Tamara etc.)
- CRM to track patient history, purchases, and internal notes
- Promo code and discount creation for campaigns or referrals

## **Hook**

Clinics lose time when payments fail or confirmations aren't instant.

## **Angle**

- High-ticket package payments
- Multi-MID retry logic
- Human support for urgent cases

## **G. High-Ticket Coaching, Advisory & Membership Communities**

### **Who**

- Executive coaches & consultants
- Business advisory firms
- Paid communities, masterminds, and memberships

### **Why they fit**

- High-ticket programs and retainers
- Payments collected via WhatsApp conversations
- Deposits, instalments, or milestone-based payments
- Relationship-driven sales process

### **Features to pitch**

- Customizable payment links allowing partial or staged payments
- International card acceptance
- Multiple payment methods (Amex, Apple Pay, Google Pay, PayPal, Tabby, Tamara etc.)
- Instant customer receipt generation
- CRM to track client history, program enrolment, and notes
- Promo code and discount creation for cohorts or referrals
- WhatsApp marketing campaigns to re-engage past clients for new programs

## **Hook**

High-ticket programs close in conversations, not on websites.

## **Angle**

- Staged payments & cohorts
- CRM + re-engagement campaigns
- Simple reconciliation

## **H. Education & Training Providers (Packages & Cohorts)**

### **Who**

- Private education institutes
- Professional training centres
- Bootcamps, certifications, and cohort-based programs

### **Why they fit**

- Package-based pricing and cohorts
- Deposits required to secure seats
- Multiple students paying remotely
- Strong need for reconciliation and tracking

### **Features to pitch**

- Multiple payment methods (Amex, Apple Pay, Google Pay, PayPal, Tabby, Tamara etc.)
- Inventory limits to limit attendance of service
- Instant customer receipt generation
- Easy reconciliation to track payments, students, and VAT
- CRM to track student enrolment, payment status, and notes
- Promo code creation for early-bird or partner discounts
- WhatsApp marketing campaigns to promote new cohorts and intakes

### **Hook**

Managing deposits, cohorts, and tracking payments shouldn't be manual.

### **Angle**

- Seat-based payments
- Promo codes & intakes
- Student tracking + reconciliation
